Work Experiences

PT. Oninyon Revolusi Kreatif Indonesia - Yogyakarta, Indonesia

Sep 2022 - Present

BACKEND DEVELOPER

Oninyon Software Solution (under PT Oninyon Revolusi Kreatif Indonesia) is a start-up company focused on custom Software Development. focusing on building the software exclusively to help our clients find a solution in their business. PT Oninyon Revolusi Kreatif Indonesia do not sell software, but provide the services to execute the solution via technology. We are simply professional and creative individuals who work together in one vision. We believe technology is a good platform to make a good social impact for the society

- **Project Contribution:** Played a key role in the development of a project owned by Mandiri Sekuritas, actively contributing to its successful implementation.
- **Go Language Development:** Utilized the Go programming language (GoLang) as the primary programming language for the project's development, showcasing proficiency in this language.
- **Database Management:** Leveraged both Postgresql and MongoDB as the project's databases, demonstrating versatility in handling different database technologies to meet the project's requirements.
- **System Integration:** Took on the responsibility of integrating the new system being developed with Mandiri Sekuritas' existing infrastructure, ensuring seamless functionality and compatibility.
- **Security and Quality Focus:** Prioritized and upheld high standards of security and code quality throughout the development process, ensuring the project's reliability and robustness.

Education Level

Universitas Dian Nuswantoro - Semarang, Indonesia

Jun 2016 - Jun 2022

Bachelor Degree in Information System, 3.29/4.00

- **Computer Laboratory Assistant**
 - **Assisting Teaching Tasks:** actively supported the teaching activities of the instructor, aiding in various aspects of the classroom instruction and ensuring a smooth learning experience for the students.
 - **Delivering Database Material:** A significant part of my role involved delivering lessons on Database concepts to the students. I prepared and presented engaging materials, helping students grasp fundamental database principles
 - **Guiding Students:** As an assistant, I offered valuable guidance and support to students during the learning process. I addressed their questions, provided clarifications, and assisted them in understanding database topics.
